Office Action Summary	Application No. 10/761,734	Applicant(s) STEWART ET AL.	
	Examiner William Oen	Art Unit 2855	

-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 1 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Election/Restrictions

Restriction to one of the following inventions is required under 35 U.S.C. 121:

- I. Claims 1-8, drawn to a generic tire tester, classified in class 73, subclass 146.
- II. Claims 9-12, drawn to a tire monitor comprising shock sensors (broadly described as "dynamometers"), classified in class 73, subclass 861.381.
- III. Claims 13-21, drawn to a tire *motion* monitoring *method* based on tire rotation, classified in class 340, subclass 444.
- IV. Claims 22-29, drawn to a tire position determining *method*, classified in class 152, subclass 152.1.
- V. Claim 30, drawn to an *electrical signal processing method* that includes temperature compensation classified (for example) in class 73, subclass 708.
- VI. Claims 31-32, drawn to a tire monitoring method, classified (for example) in class 73, subclass 146.5.
- VII. Claims 33-34, drawn to a tire monitor comprising an *accelerometer*, classified in class 73, subclass 489.

The inventions are distinct, each from the other because of the following reasons:

The inventions described hereinabove are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have

Art Unit: 2855

different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case the different inventions have different modes of operation, different functions, *and* different effects.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and the search required for each of the Groups is not required for each of the other Groups, restriction for examination purposes as indicated is proper.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art because of their recognized divergent subject matter, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Conclusion

Any inquiry concerning this communication or earlier communications from the examiner should be directed to William Oen whose telephone number is 571-272-2186. The examiner can normally be reached on 9:30am - 6:00pm.
